

Caribou Gear Synthetic Game Bags

The Industry Leading Design, Technology

Advanced Innovations For The Way You Hunt

LOCK LOOPS

Lock loops are designed to hang the bag while drying and to attach bag content identification tags (Big Game ID Tags)

Double Stitching

Stitching

Thick industrial thread is used in the design of the game bag for durability and strength. The integrated light reflective attachment, sizing tag and lock loops are sewn into the bag in an unconventional method for superior strength. This cutting-edge design was developed so that the stitching and attachments are not interfering with the breathability of the bag content.

Fabric

Synthetic fabric is a man made material, unlike grown cotton. Although cotton is comfortable to wear, it is not suited in thin layers to be used as a durable, game bag material. Heavy canvas, although is strong, it too is not suited for packing due to its weight and the negative attributes. When wet, it takes hours to dry causing the bag to lock moisture within, promoting bacterial growth and meat spoilage.

NOT A TRUE NYLON

Caribou Gear Game Bags are designed with the same quality attributes of cotton such as breathability and feel. However, our synthetic fabric goes beyond this by adding superior strength and durability in an ultra thin layer of material; therefore making a lighter packable game bag. All of this and still not forgetting the most important attribute of all...breathability.

The game bag that started the fire storm. Yes this is the original Synthetic game bag design so unique it's the only game bag to ever be offered a patent. From fabric to fabrication the state of the art material and innovative design uses only the finest materials from around the world. All to bring you the finest game bags made.

BREATHABLE - SNAG RESISTANT - BUG PROOF - BREATHABLE - EASY TO CLEAN
LIGHTWEIGHT - STRONG AND REUSABLE FOR YEARS OF SERVICE

Heavy Duty Cord & Cord Lock

Sizing Tag

The bag sizing and identification tag is a water resistant, tear proof, durable tag, designed to assist in identifying bag size and product package that it was designed for.

CG Game Bags

100% AIR CIRCULATION & BREATHABILITY, WITH NO LARGE LOGO, THICK FABRIC LAYERING OR REFLECTIVE RIBBON ATTACHMENTS ON THE BAG SURFACE.

OBSTRUCTION FREE CLEAN SURFACE FOR OPTIMUM BREATHABILITY

LIGHT REFLECTIVE ATTACHMENTS

The light reflective attachments are designed to assist in locating game bags in extreme dark conditions and game pole safe distance viewing, when hunting in bear country. The attachments are strategically located for best viewing.
